Floods in Malaysia

Malaysia experienced one of the worst floods in the country's history as five of the North/East Coast States were severely affected.

It was reported that at least seven people have been killed and over 200,000 fled their homes as authorities struggled in their rescue operations amidst power outages and destruction of homes and roads.

The East Coast states of Kelantan, Terengganu and Pahang in West Malaysia were the worst hit with several townships submerged in water. The Northern States of Perlis and Perak were similarly affected.

The Meteorological Department has issued a "yellow" stage alert for the States of Perlis, Kedah, North Perak, Kelantan, Terengganu and Johor. The alert warns of the possibility of monsoon rains and strong winds and also covers other townships in East Malaysia.

The flood situation remains serious as a number of main access roads and highways into the affected states have been cut off.

Crawford Malaysia are responding to the floods and have already received a significant number of claims. We have teams of adjusters in the affected areas undertaking assignments on behalf of clients.

If you have any claims which require our attention, please contact:
